

Aayan Noori

Chennai, India — +91-7004696785 — aayan.noori15@gmail.com — LinkedIn — GitHub — Portfolio

Summary

Computer Science undergraduate specializing in **Artificial Intelligence and Machine Learning** with hands-on industry experience in deep learning model deployment, full-stack Python web development, and enterprise ERP customization. Proficient in **PyTorch**, **Django**, **Hugging Face Transformers**, **Scikit-learn**, and **Frappe/ERPNext**. Adept at building scalable, production-ready AI-powered applications and REST API backends.

Education

SRM Institute of Science and Technology, Chennai, India Aug 2024 – May 2028
Bachelor of Technology – Computer Science Engineering (AI & ML Specialization)

Experience

Python Developer Intern Apr 2026 – Present
Spazor Labs, Chennai, India (On-site)

- Developing and customizing enterprise modules within **Frappe CRM** and **ERPNext** to automate business workflows and streamline client operations.
- Writing Python server-side scripts, REST API integrations, and Frappe hooks to extend and customize core ERP functionality.
- Building custom DocTypes, role-based permission workflows, automated processes, and form scripts within the Frappe framework.
- Optimizing **MariaDB** queries and resolving production-level ERP issues to improve system performance and data integrity.

Research Intern (Part-time) Mar 2025 – Jul 2025
Collaborative Supply Chains, Toronto, Canada (Hybrid)

- Conducted supplier outreach and market research across USA, Canada, and South Asia to support strategic procurement decisions.
- Compiled structured analytical reports enabling data-driven vendor evaluation, risk assessment, and supply chain optimization.
- Participated in on-site factory visits to assess supplier capabilities and support final vendor selection.

Research Assistant Intern Jun 2024 – Jul 2024
Samson Sky, Remote

- Researched aerospace component suppliers across India and China to support strategic sourcing and cost optimization.
- Analyzed vendor datasets and prepared structured reports assisting procurement planning and supplier decision-making.

Projects

- DeepFake Detection Web Platform** Django, PyTorch, CNN, RNN, TF-IDF, PostgreSQL, Gunicorn
- Engineered a full-stack **Django** AI content detection web app classifying images and essays as real or AI-generated using custom **PyTorch** deep learning models.
 - Designed and trained a **Convolutional Neural Network (CNN)** for image-based deepfake detection achieving **~92% accuracy** on test data.
 - Built an **RNN** text classifier with **TF-IDF** preprocessing for AI-generated essay detection with end-to-end inference pipeline.
 - Deployed production-ready using **Gunicorn**, **WhiteNoise** static file serving, and PostgreSQL/SQLite dual-database fallback support.
- UniRide – Campus Ride Sharing Platform** Python, Django, SQLite, SMTP, HTML5, CSS3
- Developed a campus ride-sharing web platform enabling students to post and browse rides using a clean **Django MVC** architecture.
 - Implemented secure user authentication, session management, profile editing, and vehicle registration using Django's auth framework.
 - Built ride posting and filtering features with **Django ORM**; integrated **SMTP email notifications** for booking confirmations and ride updates.
 - Designed a fully responsive frontend with **HTML5** and **CSS3** ensuring a smooth cross-device user experience.

Achievements

- 3rd Place – Innofusion Hackathon** (Feb 2026): Placed 3rd among multiple competing teams, demonstrating applied AI problem-solving and rapid prototyping under time constraints.
- Finalist – Bharat Build Hackathon**: Selected as a finalist in a national-level competitive hackathon.

Technical Skills

- Programming Languages:** Python, Java, SQL
- Machine Learning:** Scikit-learn, XGBoost, Supervised Learning, Classification, Regression, Feature Engineering, Hyperparameter Tuning, Model Evaluation, Cross-validation
- Deep Learning:** PyTorch, CNN, RNN, ANN, Transfer Learning, Backpropagation, Gradient Descent, Model Training Pipelines
- NLP & LLMs:** Hugging Face Transformers, Large Language Models (LLMs), TF-IDF, Text Classification, Tokenization, Transformer Fine-tuning, Prompt Engineering, Embeddings
- Web & Backend Development:** Django, FastAPI, REST APIs, Frappe Framework, ERPNext, Frappe CRM, SMTP Integration, Authentication & Authorization
- Data Analysis & Visualization:** Pandas, NumPy, Matplotlib, Seaborn, Exploratory Data Analysis (EDA), Data Preprocessing, StandardScaler
- Databases:** MySQL, MariaDB, PostgreSQL, SQLite, MongoDB
- Tools & Platforms:** Git, GitHub, Gunicorn, WhiteNoise, Jupyter Notebook, VS Code, Linux/Unix
